

OVERVIEW

Cadence, a certified Disabled Veteran Business Entity (“DVBE”), is an integrated supply company providing innovative material supply solutions to utility companies. As a successful integrated supplier, our capabilities include sourcing and procurement, material management, and region-wide logistics allowing us to improve overall core supply chain processes and reduce overall cost of doing business to our customers.

Cadence also takes pride in boasting a 100% cloud-based operating platform, allowing our systems to seamlessly support our customers’ systems and ERP packages. This industry-leading architecture allows us to modify business processes and optimize workflows at a speed and manner unmatched by other distributors.

This investment in technology coupled with our firm relationships with some of the nation’s leading manufacturers affords Cadence the unique ability to support customers with their strategic, operational and financial goals unlike ever before.
